Education

2023 — 2027

Higher College of Informatics at Novosibirsk State University (Russia)

Specialist degree, "Information Systems and Programming"

Experience

Unity Developer — Gacha Shop Simulator

2025 — present

- Initially joined the team as the second developer, but for a long time I have been the main programmer.
- Developed NPC systems, save systems built on Newtonsoft.Json and others; improved the systems that were already there.
- Worked in a team of 3 people: me, a game designer/ animator/3D artist, and the developer of the alpha version.

Unity teacher for children — Summer School of Informatics and Programming, Higher College of Informatics, NSU

2025

- Designed the curriculum for teaching children Unity.

- Worked directly with the students, taught the material and helped them sort out their mistakes.
- Prepared and presented the students' projects at the final showcase.

Freelance Unity Developer — FL.ru

2024 — present

- Took part in creating or improving 10+ projects.
- Brought some of the projects to release.
- Built up a client base and 100% positive reviews.
